To Whom It May Concern:

Our company has worked with Design 7 on many projects over the years, ranging from small wood framed office buildings, to multi-million dollar commercial projects including several in Detroit Lakes. It has been our experience that the quality and completeness of their plans and specifications have always been unparalleled in their field. When working with other architects we've noticed that incomplete plan's lead to costly extras that the owners have to absorb. We would highly recommend Ron Dick and his team at Design 7 for any project.

Sincerely

Joseph J. Hammers
